

Employment Opportunities

Job title: NJDA Programmer

Reference #: NJ2009

Job Location: Trenton, NJ

Contract Position (Y/N): Y

Posted Date: 10/21/09

Job description:

Programmer is responsible for design, develop, test and maintain a medium level J2EE Web Application involving Credit Card Management and Electronic Transfers.

Project Details:

Pursuant to N.J.A.C, all producers, handlers, and dealers buying, selling or distributing Certified Organic products in New Jersey are required to register with the NJDA, Division of Marketing and Development. In addition, any accredited certifying agents certifying any New Jersey organic operation are required to register. The NJDA will develop an online web-based application, accessible through the State web site that will allow these businesses and individuals to do this online. The online application will allow online payment which will result in licenses and registrations being issued almost instantaneously.

Environment: J2EE

Citizenship Required (Y/N): Y

Skill Set:

Years of Relevant Experience: 3 years
Preferred Education: 4 year college degree or equivalent technical study.

Role Description Requirements:

- Participate in all aspects of web application development, including application designing, coding, testing and deployment, and ongoing maintenance and support.
- Thorough knowledge of software development life cycle.
- Working experience with JSP, JSTL, HTML, servlets, tag libraries in Java, Struts, JavaScript, CSS, JDBC, Web Services, XML and JUnit.
- Good experience in writing complex SQL queries and Procedures.
- Experience with Sun Application Server and Java Studio IDE.
- Working knowledge of version control software such as CVS.
- Knowledge of Spring Framework, Hibernate, AJAX, and Java Mock Objects.
- Experience using Java/J2EE Design Patterns.
- Prior Experience in developing Credit Card applications.
- Develop Reports using Crystal Reports XI and integrate with the application.
- Develop user procedures, materials and training documentation.
- Conduct system performance and user acceptance tests.
- Perform Application Load/Stress test.
- Self-starter with strong interpersonal and communications skills.
- Ability to work in a flexible environment and adapt to changing requirements and priorities.
