Job title: NJOIT-System Administrator

Reference #: NJ2110

Job Location: Mercer County, NJ

Contract Position (Y/N): Y

Posted Date: 03/03/10

Job description:

Migrate physical servers to VMs using VMware. Develop back up and restore procedures for full images and files using TSM and VCB servers. Develop disaster recovery architecture and restoration procedure for virtualized environment.

Complete Description:

- 1) Migrate the workloads of physical servers to virtual machines using VMware technology. The migrations must be performed off-hours - early mornings, nights and weekends to minimize downtime to the client.
- 2) Develop, test, automate and document the back up and restoration of full virtual machine images and files using Tivoli Storage Manager (TSM) and VMware consolidated backup (VCB) server.
- 3) Develop, test, automate and document a VMware virtualized environment disaster recovery architecture and restoration scenario using TSM and the VCB server.
- 4) Create virtual machines for new applications as needed.
- 5) As time permits, upgrade the operating system on back leveled virtual

machines.
