

Employment Opportunities

Job title: Provisioner – Engineer

Reference #: VA1703

Job Location: Chester, VA

Contract Position (Y/N): Y

Posted Date: 1/15/09

Job description: Provisioning Engineer will partner with technical management as part of the team providing circuit provisioning support for an accelerated data circuit transformation on a multi-year major program. Responsibilities to include but not limited to the following: The ordering, activation, shipping and tracking of various telecommunication equipment (such as routers, switches, etc.); ongoing maintenance and updates of integrated program schedules/plans. Job involves soliciting, analyzing and proactively challenging schedule inputs/updates as well as recommending work-arounds to project leads. Position involves weekly and monthly updates, key role in schedule reviews, and timely reporting for program and customer reviews. Position requires a candidate have 3-6 years circuit processing experience including experience with MPLS WAN Protocols. Position requires proactive interface skills, strong teamwork ethics and the ability to provide surge support during critical exercises. Proficiency in standard MS Office tools (Excel, Word, PowerPoint) is also important in this role. After-hours and weekend work may be required.

Citizenship Required (Y/N): Y

Skill Set: Educational Requirements:

Bachelor's degree and a minimum of 4-6 years Practical experience with information technology infrastructure operations and telecommunication service provider and /or carriers.

Practical experience with telecommunication service industry infrastructure, operations and service management.
